Customer Feature (1)

Support for synthetic data

[[RENO-18267](#), As FM, I want to support synthetic testdata]

Feature (4)

FM installations can have a configuration to skip CAVE processing from PLL messages. If configured and set to "skip", no CAVE records are processed from incoming PLL messages nor sent out.

[[RENO-18476](#), As FM, I want to ignore CAVE in incoming PLL]

FM installations can have a configuration to skip CAVE processing from PLL messages. If configured and set to "skip", no CAVE records are processed from incoming PLL messages nor sent out.

[[RENO-18477](#), As a PLL doctor, I never want to send CAVE in PLL]

Adding configuration for ignoring PLL cave

[[RENO-18479](#), As an admin, I want to configure handling of incoming CAVE in PLL and outgoing CAVE in PLL]

Don't show Cave tab in samstemming when it is configured that way

[[RENO-18480](#), As a samstemming user, I don't want to see CAVE samstemming]
