

Forskrivningsmodulen (e-resept) 4.6.0 RC2 (#17514)

Release Notes

3.8.2019

Customer Defect

Fixed error when cleaning up Helseld failed client registrations

[RENO-15421, Cleaning up Helseld client registrations is not working]

Fixed browser freezing errors when performing Helseld login

[RENO-15393, No result after PIN code to KJ lookup for Doctor]

Defect

Empty prescriber ("Forskriver") strings should no longer be padded with 9 zeros.

[RENO-15436, Resolved, Forskriver is set to be 000000000 in prescriptions that are notInRF]

Fixed an issue where notification on not included locked prescriptions was shown twice when RF lookup was processed.

[RENO-15431, Resolved, User notified of locked prescriptions in LIB that haven't been added to the LIB]

Notification on not included locked prescriptions was shown twice when RF lookup is processed. This has been fixed.

[RENO-15425, Resolved, Notification on not included locked prescriptions is shown twice when RF lookup is processed]

Fixed an issue where the same local Refnr was shown multiple times in a warning message related to RF lookup

[RENO-15424, Resolved, Same local refnr shown multiple times in a warning message related to RF lookup]

Improved error handling and tracing when performing Helseld logins.

[RENO-15420, Resolved, Errors occurring during Helseld login are not properly handled/show]

A few issues were fixed related to the Meona discharge Samstemming (RFC#12).

[RENO-15417, Resolved, History items in samstemming are shown differently in new samstemming than in reopened samstemming]
